The performance quoted represents past performance, does not guarantee future results and current performance may be lower or higher than the data quoted. The investment return and principal value of an investment will fluctuate so that shares, when redeemed, may be worth more or less than their original cost. Performance data current to the most recent month end may be obtained at www.emeraldmutualfunds.com. Investment performance reflects fee waivers in effect. In the absence of fee waivers, total return would be lower. Total return is based on NAV, assuming reinvestment of all distributions. Performance does not reflect the deduction of taxes that a shareholder would pay on Fund distributions or the redemption of Fund shares.

* Excludes sales charge. ** Reflects effects of the Fund's maximum sales charge of 4.75%.

+ Excludes contingent deferred sales charge. ++ Includes the effects of the 1% deferred sales charge.

Portfolio Management

The Fund portfolio is managed by a veteran investment team with 77 years collective investment experience. As a result of an on-going comprehensive risk assessment process the team seeks to control volatility by diversifying the Fund's portfolio among subgroups within each industry sector and seeks to minimize risk by unequally weighting the percentage ownership of companies held.

Diversification does not eliminate the risk of experiencing investment losses.

Objective

The Fund seeks long-term growth through capital appreciation.

The Fund can invest in companies from a wide range of industries and of various sizes, including investments in mid and small-size companies. The Adviser typically defines mid-size companies as those having a market capitalization equal to or less than that of the largest companies in the Russell MidCap® Growth Index, and small-size companies as those having a market capitalization equal to or less than that of the largest companies in the Russell 2000 Growth Index. The Russell 3000® Growth Index is an unmanaged index comprised of those Russell 3000 companies with higher price-to-book ratios and higher forecasted growth values. The Fund seeks companies with perceived leadership positions and competitive advantages. The portfolio is diversified across industry sectors and includes companies that do not receive significant coverage from other institutional investors.
