Objective

The Fund seeks long-term growth through capital appreciation.

The Fund emphasizes a value investment style, investing in companies that appear underpriced according to certain financial measurements of their worth or business prospects. The Adviser defines small capitalization companies as those with a market capitalization between, and including, the smallest and largest companies contained in the Russell 2000® Value Index at the time of purchase. Under normal conditions, the Fund will invest at least 80% of its total assets in common stocks of domestic small capitalization companies, focusing on companies the Adviser believes possess a consistent track record of strong financial productivity. The Fund may invest up to 20% of total assets in American Depositary Receipts (ADRs) of small cap companies. ADRs are certificates evidencing ownership of shares of a foreign-based issuer held in trust by a bank or similar institution. They are alternatives to the direct purchase of the underlying securities in their national markets and currencies.
